Art Unit: 1652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1, 21 and 43-44, drawn to a catalytic antibody for degrading cocaine, classified in class 435, subclass 188.5.

- II. Claims 41-42, drawn to a nucleic acid encoding catalytic antibody 3B9, classified in class 536, subclass 23.2.
- III. Claims 41-42, drawn to a nucleic acid encoding catalytic antibody 6A12, classified in class 536, subclass 23.2.
- IV. Claims 41-42, drawn to a nucleic acid encoding catalytic antibody 2A10, classified in class 536, subclass 23.2.
- V. Claims 41-42, drawn to a nucleic acid encoding catalytic antibody 9A3, classified in class 536, subclass 23.2.
- VI. Claims 41-42, drawn to a nucleic acid encoding catalytic antibody 19G8, classified in class 536, subclass 23.2.
- VII. Claims 41-42, drawn to a nucleic acid encoding catalytic antibody 15A10, classified in class 536, subclass 23.2.
- VIII. Claims 41-42, drawn to a nucleic acid encoding catalytic antibody 12H1, classified in class 536, subclass 23.2.
- IX. Claims 41-42, drawn to a nucleic acid encoding catalytic antibody 8G4G, classified in class 536, subclass 23.2.
- X. Claims 41-42, drawn to a nucleic acid encoding catalytic antibody , 8G4E, classified in class 536, subclass 23.2.
- XI. Claims 45-48, drawn to a pharmaceutical composition for decreasing the concentration of cocaine and for treating cocaine overdose and a method for decreasing the concentration of cocaine and for treating a cocaine overdose, classified in class 424, subclass 175.1 and 94.1.

Application/Control Number: 09/940,727

Art Unit: 1652

The inventions are distinct, each from the other because of the following reasons:

Group I and groups (II-X) are drawn to completely different chemical compounds that are patentably distinct.

Groups II-X are drawn to completely different nucleic acid molecules.

A perusal of the specification does not indicate what SEQ ID NOs encode each of the 9 catalytic antibodies.

Inventions I and XI are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process such as to degrade cocaine not related to medicinal treatment.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

It is noted that claims 1 and 21 would be subject to statutory double patenting rejections over claims 1 of U.S. Patents 5,948,658 and 6,280,987, respectively. If these claims were deleted or amended so as not to be subject to a double patenting rejection, the examiner would seriously consider

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles L. Patterson, Jr., PhD, whose telephone number is 703-308-1834. The examiner can normally be reached on Monday - Friday, 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ponnathapura Achutamurthy can be reached on 703-308-3804. The fax phone number is 703-308-4242.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0196.

Charles L. Patterson, Jr Primary Examiner
